PROFESSIONAL PROFILE

Professional with experience as a backend developer. Knowledge of programming languages like Java and JavaScript, server administration, and relational and non-relational databases. Enthusiast of cybersecurity and networking, eager to learn new technologies to expand my horizons and grow personally and professionally.

EXPERIENCE

UNIVERSIDAD DE GUADALAJARA

IT Support (Social Service) 2023/2024

- Implement a Network Monitoring System (Zabbix) to keep track of the health of Linux servers, docker containers, and Databases.
- Implement stress tests for web applications with JMeter, then implement Jenkins to automatize the stress tests.
- Create credentials/users with different privileges from different servers for team members.
- Develop and test a web application that stores and monitors all the documentation received from different locations using JavaScript with node.js for the backend, vue.js for the front end, and MongoDB for the database.

WIPRO TECHNOLOGIES

Software Engineer 2022/2023

- Create and modify projects created with Spring Boot and Maven.
- Test new functionalities on the API developed.
- Apply Agile methodologies, (SAFe, SCRUM).
- Listen to requirements and develop the functionalities.

CARL'S JR.

Kitchener 2019/2020

- Manage and coordinate my teammates in the kitchen to obtain an effective and efficient job.
- Maintain the delivery of the meals below 3 minutes while keeping the quality.
- Unload, store, and inventory the supplies for the store.
